Warranty Policy

Protection Plus (The Company), warrants to the original purchaser of our product, that should this product or any part thereof, under normal use and conditions, be proven defective in material or workmanship within the given accessory's manufacturer's specified warranty, from the original date of installation, such defect(s) will be repaired or replaced (at the company's option), without charge for labor within one year from the date of installation. Thereafter, there will be a labor charge assessed to repair or replace the item(s).

Under no circumstances shall the company be liable for any loss or damage, direct or consequential, arising out of the use or inability to use our products.

Based on availability, Protection Plus may substitute replacement parts with like or equal value equipment.

Protection Plus pricing and warranty policies are subject to change without notice

Mission Statement

Protection Plus, who are we and what do we do? To start, we feel a little background on our company is appropriate. Because we will be involved with many people and departments throughout your dealership, it is important to understand our commitment to you and the dealer, our customer.

Protection Plus is the largest aftermarket company in Nevada. We have over 65 years of combined automotive and F&I experience. It is our intent to provide you with the quality and service you require. Protection Plus is a local company. Our goal to provide the absolute best service to our dealers requires us to be in continuous contact with everyone involved throughout the dealership. With this commitment, we are capable of providing these services unlike anyone in our industry.

Protection Plus owns and maintains it's offices and installation facility. This further reinforces the point that we are here to stay. Investments in a 4500 sq. ft. office building and 6500 sq. ft. of installation area give us the advantage of providing complete and professional service to you and your customers. Our staff includes certified technicians, technical support personnel, inventory control coordinators, dispatch coordinators and business support personnel. All of our technicians are radio dispatched to provide rapid response to important issues and questions. Also, our technicians are MECP (Mobile Electronics Certification program) certified to ensure quality workmanship and technical support.

Because Protection Plus is the largest aftermarket company in Nevada, we can focus our attention to doing business exclusively with new and used car dealerships. Unlike our competitors, we have a **NO RETAIL** policy. We will not provide product or services on a retail basis. Everything is channeled through the originating dealer to ensure confidentiality and consistent pricing.

In summary, Protection Plus will always provide you, our customer, with only the best in service and products. Our commitment allows us to maintain long term business relations as well as helping our dealers to achieve the goals they require. By cultivating new business ideas and building on current business, we can help you achieve profitable programs.

Please feel free to call us with any questions you might have or stop in and tour our facility while meeting our great team at Protection Plus.
